

Silicon- & Wachsentferner

Silicone remover, soluble in water

page 1 of 1

Alcohol-based solvent for removing silicone oils, waxes, oils such as polish residues, etc. from all solvent-resistant surfaces. The treated surfaces are optimally prepared for further processing steps (painting, 1K-Nano paint sealing, etc.). Contains no halogenated hydrocarbons.

Areas of use

Solvent-resistant paints and plastics, glass, metal, etc.

Recommendations for use

Depending on the surface apply undiluted or diluted up to a 1:4 and wipe off with a clean and dry cloth. In case of sensitive uni- or single-layer paint or similar sensitive surfaces dilute 1:4 with water to prevent matting.

Container

Container	Item no.
5 L	207005

Warnings

Before using, check colour fastness and material compatibility.
